East Yangon University (EYU, Tarwa)   Yangon, Myanmar
Bachelor of Arts   Expected May 2026
Major in Law

WORK EXPERIENCE

ONE WAITER (Upwork)   Remote, On Upwork
Web Developer   Jan 2023 – Present
- Contributed to crafting responsive user interfaces from scratch using HTML, CSS, and JavaScript. Emphasized user-centric design principles and seamless interactivity, aligning closely with client wireframes
- Developed and optimized APIs, server-side logic, and seamless database integration using PHP and Laravel; streamlined data processing time by 40% and increased system response rate by 25%
- Utilized a relational (MySQL) database to proficiently store, retrieve, and manipulate data, emphasizing data integrity and security as key priorities
- Contributed to the seamless integration of front-end and back-end components to construct comprehensive web applications that deliver flawless functionality and user experiences

ENJOY LIFE REAL ESTATE (INTERN)   Yangon, Myanmar
Data Researcher   Jan 2020 – Mar 2020
- Worked on researched real estate data to create compelling content and scripts for videos for their Facebook page for marketing purposes. The outcome was a substantial increase in page followers
- Stayed informed on real estate trends, regulations, and news, providing valuable insights to guide marketing and investment decisions
- Collectively identifying and selecting images for video content. Collaborated closely with the team to ensure that chosen photos complemented the video's narrative, resulting in visually engaging content that resonated with the audience

PROJECTS

WebQAChat | JavaScript, Chrome Extension
- Developed intuitive and visually captivating user interfaces by using HTML, CSS, and JavaScript for the "webQAChat" Chrome extension. This effort significantly enhanced user engagement and interaction within the extension's framework
- Collaborated with the backend team to seamlessly combine frontend components using Axios, ensuring a smooth and unified experience for the "webQAChat" Chrome extension.

Ecommerce Website | JavaScript, React, Bootstrap, Php, Laravel, MySQL
- Leveraged Bootstrap and React for responsive interfaces with uniform functionality. Prioritized user experience through intuitive layouts, seamless navigation, and interactive components using React
- Contributed to backend development using Laravel, ensuring efficient data processing, secure API endpoints, and seamless integration between frontend and database.

Company Admin Website | JavaScript, React, Bootstrap, Php, Laravel, MySQL
- Used Bootstrap and React for responsive, engaging user interfaces in the company management admin web app. Prioritized user experience with intuitive navigation and interactive React components
- Contributed to backend development using Laravel and MySQL, establishing robust data processing, secure API endpoints, and smooth integration between frontend and database
